

NO DIVERSITY NO HUMANITY

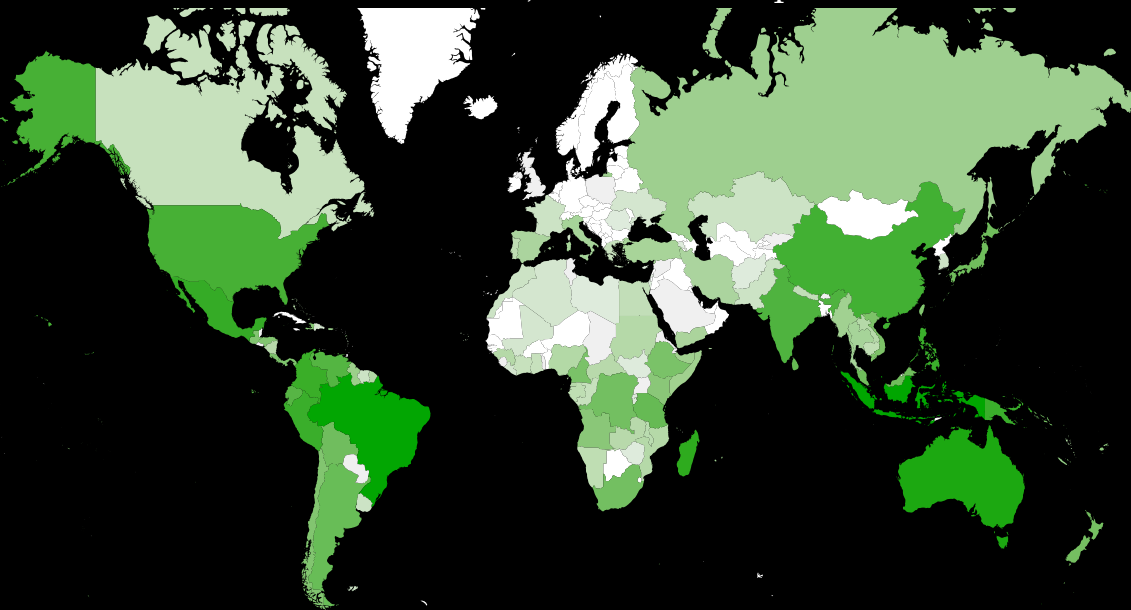

Living Planet Index(LPI) and Human Planet Index(HPI)

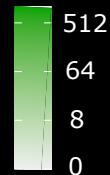

LPI is an indicator of the state of global biological diversity

HPI shows human population growth since 1970

Endemic mammals, birds and amphibians

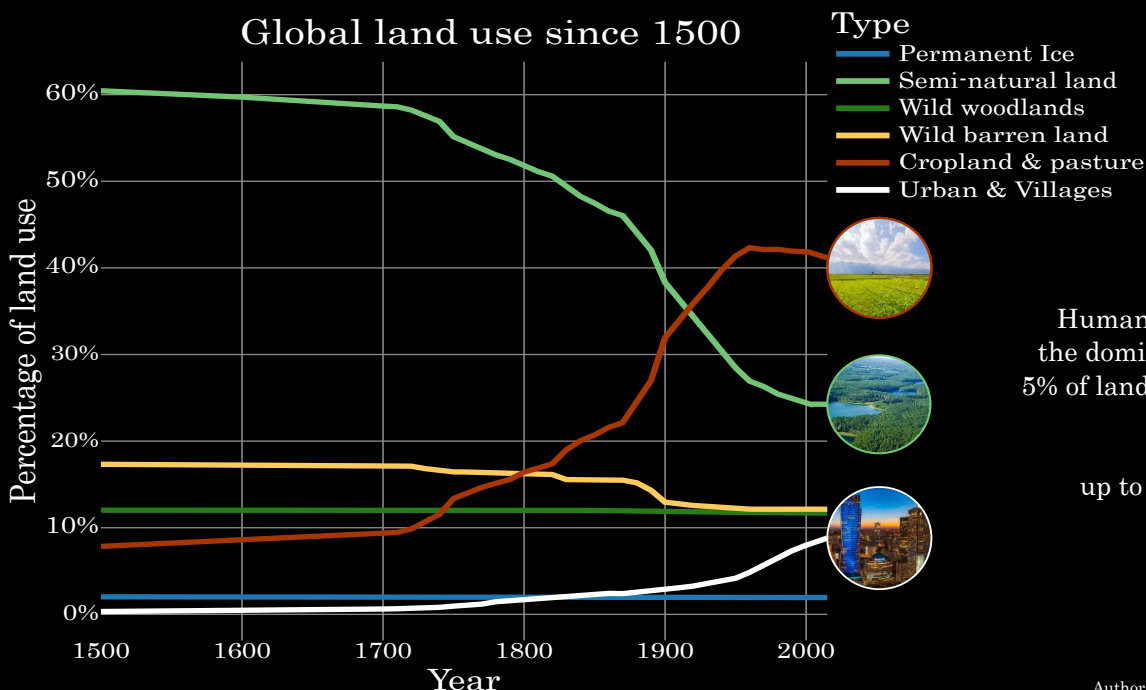

Number-logarythmic scale

Endemism is the state of a species being native to a single defined geographic location

Global land use since 1500

Humans very quickly became the dominant land user, reaching 5% of land use around the year 900; 10% by 1700; 25% by 1880; up to half of all land today
